

20. Assertion (A): If the perimeter of a circle is half that of a square, then the ratio of the area of the circle to the area of the square is $1:\pi$.

Reason (R): Area of a circle is πr^2 and Area of a square is $side^2$.

- (a) Both A and R are true and R is the correct explanation of A.
- (b) Both A and R are true but R is NOT the correct explanation of A.
- (c) A is true but R is false.
- (d) A is false but R is true.
