(Case-Based Questions) (3 x 4 = 12)

34. Read the source given below and answer the questions that follow: *The Print Revolution and its Impact* The earliest kind of print technology was developed in China, Japan and Korea. This was a system of hand printing. From AD 594 onwards, books in China were printed by rubbing paper - also invented there - against the inked surface of woodblocks. As both sides of the thin, porous sheet could not be printed, the traditional Chinese 'accordion book' was folded and stitched at the side. Superbly skilled craftsmen could duplicate, with remarkable accuracy, the beauty of calligraphy.

(34.1) Which countries developed the earliest print technology? (1)

(34.2) Why were traditional Chinese books folded and stitched at the side? (1)

(34.3) How did the print culture travel from China to Europe? (2)
