

35. Read the source given below and answer the questions that follow: *Conservation of Energy Resources* Energy is a basic requirement for economic development. Every sector of the national economy – agriculture, industry, transport, commercial and domestic – needs inputs of energy. The economic development plans implemented since Independence necessarily required increasing amounts of energy to remain operational. As a result, consumption of energy in all forms has been steadily rising all over the country. There is an urgent need to develop a sustainable path of energy development. Promotion of energy conservation and increased use of renewable energy sources are the twin planks of sustainable energy.

(35.1) Why is energy considered a basic requirement for economic development? (1)

(35.2) Mention any one way to conserve energy in our daily life. (1)

(35.3) Why is there an urgent need to use renewable energy sources? Explain two reasons.
(2)
